What is JEDI?

Justice + Equity + Diversity + Inclusion

With justice leading the way, we approach our work from the perspective of remediating past and preventing future harms through intentional engagement with all.

Who is SCEN?

SCEN is a network that envisions the Southeastern U.S. as the leading region for just, equitable, and inclusive solutions to the climate crisis. We aim to make this vision a reality by creating strategic alignment, growing capacity, and building power among our member organizations and their communities in the Southeast.

Why is this JEDI Training Series different?

This SCEN JEDI training series stands out from others as it actively links each area of focus to organizational programs, policy, and institutional management practices. By the end of each session, participants will have a working understanding of how their current organizational culture impacts personnel and community interaction. This will lead to a clearer vision for increased organizational health and community relationships.

Pre-recorded Lecture Series

Designed to help you unpack each topic so that those on your team who are unable to join the live virtual events can still share in the learning experience needed to fully participate in a cultural shift at your organization.

Live Virtual Trainings

An immersive multi-perspective experience that leads you from an introduction of each topic to understanding its impacts on workplace functionality and the effectiveness of the climate movement.

Areas of Focus

- Gender
- Sexuality
- Religion
- Racism
- (Dis)ability
- Ageism
- Socioeconomic status
